THE SCIENCE

Dalai Dog

'Our flooring is a glue down system which will ensure your floor is fully water resistant and will not warp over time like click-flooring can. We have recommended installers throughout the UK who will prepare your sub-floor and install the flooring or you can use your own. It is under-floor heating compatible and can be mopped without the need for any harmful chemicals or steam cleaners, and with our quick lead times you can stay relaxed!'

Doctor Dog

'All Floors For Paws flooring is either a safety flooring or has embossed micro-ridges to help your dog get more grip than on smooth flooring. Your dog will be able to walk with confidence and in comfort. If slip resistance is your primary concern, consider our **PawSafe domestic range** for your home. All our floors are hypoallergenic.'

Detail Dog

'After receiving samples, send our humans the size of your room(s) and let them know what you currently have on your floor (carpet, tiles, laminate) and if possible under your floor (concrete or floorboards). They will then send you a detailed supply and install guide price for your project. If you wish to use one of our approved sub-contractors to carry out the subfloor works and fitting we will arrange a survey, once this is done we will send you a confirmed quote. At this stage you chat with your dog and decide if you wish to go ahead. We also offer a supply only service.'

Disco Dog

'It's party time! This stuff is anti-scuff, anti-stain, and anti-scratch. Spillages such as wine, black coffee, tea, dog drool, and dog urine (hey; it happens) are not a problem due to the water resistant top wear layer that prevents liquid damaging your floor. Simply wipe clean and keep on dancing. 100% P.A.R.T.Y proof.'

This product is great for preventing dogs from slipping and will prevent injuries that will may lead to developmental joint disease.

Dr. Hannah Coppell

Our PawSafe domestic range is endorsed by Canine Arthritis management. It has a PTV slip rating of 102 in dry areas and 48 in wet areas under the British Standard BS 7976 Pendulum Test, giving it the highest slip rating of any luxury vinyl plank on the market. The 0.6mm wear layer made up of 5 separate layers for maximum durability allows us to offer a 30 year domestic guarantee. The unique comfort backing provides better cushioning for your dog's joints and has the added benefit of high sound absorption. (So no more noisy tapping from your dog's claws) Available in six realistic stone designs and twelve realistic wood effects. A safety flooring without compromising on your interior aesthetics.

OK - HANCOCK COLLEGE

PawSafe pet friendly flooring offers a waterproof, hard wearing and easily cleanable surface for your Veterinary practice, while also being completely safe for your most important client; The Pets! With a British standard pendulum slip rating of 96 PTV in dry areas and 63 PTV in wet, this is a class leader in safety flooring and is endorsed by Canine Arthritis Management. We are proud sponsors of this cause. Our 12 realistic and cushioned designs create a more homely environment for pets which we hope will ease anxiety and make the visit to your practise more comforting. In fact, we recommend this flooring for any pet friendly commercial application.

GREAT PRODUCT, GREAT TEAM! SILVANA HAWKES

Mo and the team were SO helpful when deciding which flooring to opt for. They went back and forwards with me regarding samples, and made suggestions as to those with the most grip. Our dog had recently been paralysed and had spinal surgery and could not walk on our tiled or laminate flooring. We were nervous as to whether there would be enough grip for him to manage and after finding floors for paws, we took the plunge. I am delighted that our dog is now able to freely walk around the house with no slips and we know he is safe!

CLIENTS LOVE IT TOO - RACHAEL RICHARDSON - THE RENEW CENTRE

We had floors for paws fitted throughout our veterinary clinic which is a dedicated canine rehabilitation and pain management centre. We wanted a high quality comfortable and non slip flooring and it does the job perfectly even in our hydrotherapy room. The non slip floor really helps put our patients at ease even though many of them are painful, anxious or geriatric. The clients love it too. It looks smart and less clinical, helping to create our relaxed but professional atmosphere. We have had the flooring done for two years now and it still looks like new.

OUTSTANDING PRODUCT AND CUSTOMER SERVICE! - JESSICA BABER

The people at F4P are fantastic! Always incredibly helpful before, during, and after ordering/installation. Our fitter Jon was wonderful too. Very professional, incredibly thorough, and even came back for snagging issues. My four large dogs also loved him (and the feeling was mutual!)
The flooring itself is AMAZING! Easy to clean, always LOOKS clean (no more little dust and hair balls floating into corners), copes with messy drinkers and wet paws, and NO MORE BAMBI LEGS!

I'M A VETERINARY PHYSIOTHERAPIST - LISA CLETON

I'm a veterinary physiotherapist so I'm really obsessed with dogs not walking on slippy surfaces, especially in the home. I have just had the paw safe flooring laid in my bedroom. I slo-mo filmed my 11 month cocker pup trotting over it as there is really no slippage. I'm very pleased with it.
